## National Lung Cancer Partnership

The National Lung Cancer Partnership is a 501(c)(3) non-profit organization dedicated to decreasing deaths due to lung cancer, and helping patients live longer and better, through research, awareness and advocacy. Founded in 2001 as Women Against Lung Cancer, the organization changed its name to National Lung Cancer Partnership in 2006 to better reflect the partnership we have forged with physicians, researchers, lung cancer survivors and their families, advocacy organizations, and the media to help achieve our mission.

In order to lengthen and save the lives of current and future lung cancer patients, it is imperative that there is research into understanding the biological basis of lung cancer, how the disease progresses, how it can be screened and treated, and its symptoms managed successfully. National Lung Cancer Partnership is working tirelessly to raise awareness of lung cancer, in an effort to increase federal and private funding for lung cancer research, and an accompanying increase in the number of lung cancer researchers.
